The Environmental Technology Network

### With us, green innovation succeeds through diversity and competence!

Our members come primarily from these five areas:

-  Decentralized energy systems
-  Building technology and building energy efficiency
-  Circular economy and recycling management
-  Water and wastewater
-  Environmental technology in general

Ecoliance offers the networking platform of the leaders in environmental technology. The network bundles the competencies of its members into a powerful and project-oriented alliance. Holistic solutions are created when industry, science, and politics pursue common goals.

Join in and get to know the whole diversity of Ecoliance Rheinland-Pfalz e.V. Create innovative solutions with our partners to urgent challenges of environmental and climate protection.

### Ecoliance – We stand for GreenTech: information, cooperation, and innovation

Ecoliance Rheinland-Pfalz e.V. is the environmental technology network in Rhineland-Palatinate. Our members are companies, universities, chambers of commerce, associations, and research institutions interested in the exchange of GreenTech experience.

Together, we unlock innovation potentials in environmental technology. We work for strong environmental technology industry. Our common objective is to restructure the economy sustainably towards resource and energy efficiency and sustainable products and services.

We see digitalisation as a motor for innovation. We believe that the environment and digitalisation go hand in hand, and we empower our members to develop best practices.

### Ecoliance - We are the multiplier for your ideas.

As a network, we strengthen your visibility in public, in science, in politics, and on international markets. Increase your reach through us and use us as a multiplier for your ideas. Benefit from the contacts to our many partners, such as other clusters and abroad, especially in the Greater Region. Increase your business visibility and enhance the potential of your company by networking with us.
